KOHLHOFF BACKSTAYS (Gottifredi Maffioli Ultrawire 99)				

Gottifredi Maffioli hat sein beliebtes und einmalig langlebiges ULTRAWIRE nun auch aus DSK99 auf den Markt gebracht. Selbst der Vorgänger ist bei uns zu unzähligen Achterstagen, Backstagen, Kutterstagen und sonstigem Drahtersatz verarbeitet worden. Unglaublich robust und langlebig zeigt sich Ultrawire 99 noch einmal verbessert als eine herausragende Weiterentwicklung. Unersetzbare Lösungen aus diesem Produkt für kleine- und mittelgroßen Yachten bis 50 Fuss sind bisher unerreichbar. Egal ob wir daraus Stroppen, textile Reling oder Achterstage bauen. Unsere Kunden sind einfach begeistert. Die beeindruckende Festigkeit bei geringstem Gewicht überzeugt auf sympathische Art und Weise.

Bestellhinweis: Geben Sie bei der Bestellung die gewünschte Fertiglänge unter Last an. Wir strecken die Stage auf unser Hydraulikstreckbank auf etwa 1/4 der Bruchlast und nennen diese Last SWL (Safe Working Load). Unter dieser Last haben unsere Stagen die gewünschte Länge. Wenn Sie die Stage geliefert bekommen, kann die Länge entsprechend kürzer ausfallen und haben erst nach dem Auseinanderziehen die gewünschte Länge. Abgerechnet wird immer die nächst größere Länge, z.B.: Fertiglänge 12,45m - wir berechnen dann 13,00m.

KOHLHOFF FURLING LINES				

Gottfredi Maffioli steht für Tauwerk mit herausragender Qualität und Lebensdauer. Gerade in Spezialgebieten ist der italienische Tauwerkhersteller führend und wegweisend. Für den anspruchsvollen Aufgabenbereich der Furlerleinen kommen die letzten Entwicklungen aus dem Volvo Ocean Race und der IMOCA 60 Szene zum Einsatz, wo nur das Beste vom Besten gerade gut genug ist. Endlos gespleißte Leinen für alle handelsüblichen Code Zero Furler oder auch Mastreffleinen in den Stärken 6,8 und 10mm. Mit den besten Materialien DSK78 im Kern und Polyester/Vectran/Kevlar Mänteln (außer 6mm dort Dyneema und Polyester).

KOHLHOFF - CUSTOM FURLING ROPES (Torsional ropes)				

Das Kohlhoff Dynlce Dyneema® Antitensionskabel ist eine ausgezeichnete Lösung für kleinere und mittelgroße Yachten. Neben der hohen Torsionsleistung ist die Bruchfestigkeit dieses Kabels hervorragend, da es aus unter einer speziellen Wärmebehandlung vorgereckt wird. Die beiden Polyester und Dyneema® - Mäntel werden mit einem speziellen PU-Kleber verklebt. Für optimalen Grip und ausgezeichnete Antitensionseigenschaften hat der äußere Mantel einen speziellen Flechtwinkel. Das Kabel wird mithilfe unseres „S-Splice“- Verfahrens auf jede individuelle Länge fachmännisch auf Länge gespleißt und mit den LOOP® Furling Kauschen passen sie in jeden handelsüblichen Furler. Der Aramid Spezialmantel verhindert das aufrutschen des Spleißes und sorgt für die optimale Krafteinleitung. Bitte geben Sie bei der Bestellung unter "Besondere Anweisungen" die tatsächliche Länge an.
